

Assignment 1

Kavan Dalwadi

SKILLS

C
C++
Java
Python
Network
HTML

CONTACT

Mobile: +91 987654321
Email: dalkavan2000@gmail.com

ACADEMIC EXPERIENCE

2nd Sem : Client Server model
3rd Sem : Socail Android App
4th Sem : Sentimental analysis over Feedback Form

EDUCATION

BACHELOR OF COMPUTER ENGINEERING, CHARUSAT 2018-Present
HSC, DZ Patel School 2016-2018
SSC, Smt SR Patel School 2015-2016

PARTICIPATION

IOT workshop at charusat 2019
CSI AWS Alexa workshop at charusat 2020
CCNA 2019

Assignment 2

Our solar system consists of an average star we call the Sun, the planets Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto. It includes: the satellites of the planets; numerous comets, asteroids, and meteoroids; and the interplanetary medium. The Sun is the richest source of electromagnetic energy (mostly in the form of heat and light) in the solar system. The Sun's nearest known stellar neighbor is a red dwarf star called Proxima Centauri, at a distance of 4.3 light years away. The whole solar system, together with the local stars visible on a clear night, orbits the center of our home galaxy, a spiral disk of 200 billion stars we call the Milky Way. The Milky Way has two small galaxies orbiting it nearby, which are visible from the southern hemisphere. They are called the Large Magellanic Cloud and the Small Magellanic Cloud. The nearest large galaxy is the Andromeda Galaxy. It is a spiral galaxy like the Milky Way but is 4 times as massive and is 2 million light years away. Our galaxy, one of billions of galaxies known, is traveling through intergalactic space.

The planets, most of the satellites of the planets and the asteroids revolve around the Sun in the same direction, in nearly circular orbits. When looking down from above the Sun's north pole, the planets orbit in a counter-clockwise direction. The planets orbit the Sun in or near the same plane, called the ecliptic. Pluto is a special case in that its orbit is the most highly inclined (18 degrees) and the most highly elliptical of all the planets. Because of this, for part of its orbit, Pluto is closer to the Sun than is Neptune. The axis of rotation for most of the planets is nearly perpendicular to the ecliptic. The exceptions are Uranus and Pluto, which are tipped on their sides.

	MERCURY	VENUS	EARTH	MOON	MARS	JUPITER	SATURN	URANUS	NEPTUNE	PLUTO
>Mass (10^{24}kg)	0.330	4.87	5.97	0.073	0.642	1898	568	86.8	102	0.0146
Diameter (km)	4879	12,104	12,756	3475	6792	142,984	120,536	51,118	49,528	2370

Assignment 4

A registration form titled "Registration Form" is centered on a blue gradient background. The form is enclosed in a black border and contains the following fields and controls:

- Name***: A text input field.
- Gender :** Radio buttons for **Male** and **Female**.
- Country :** A dropdown menu with "India" selected.
- Email***: A text input field.
- Password***: A text input field.
- Phone No***: A text input field.
- Submit** and **Reset** buttons at the bottom.

Assignment 5

National Workshop on Web Technologies

Details of the
Workshop:
DATE: 21 april 2020

Venue: RPCP Seminar
Hall

Schedule

8:00-9:00 Reporting
9:00-10:00 Introduction
on React Js
10:10-11:00 Hands-ON
11:00-12:00 Break
12:00-2:00
Development on React
JS

Registration Form

Name* :

Email* :

Gender : Male ☐ Female ☐

You are :

Phone No* :

Welcome to CSPIT-CE
